The Essentials of your Clipper

Best conditions for clipping

Bathe your pet/your dog. Please only use pet shampoo/dog shampoo for a specialist shop (e.g. # 29195 Natural Oil Shampoo). Completely dry the fur, you might use a hair dryer (e.g. #23888 Warm Air Dryer). Comb the fur and remove any coarse mats. When clipping, pay attention to always guide the clipper head along the pet's/dog's body holding it parallel to it and do not hold it upright. That way you get the best result when clipping.

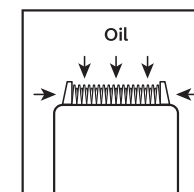

Cleaning the Clipper

Remove all hair rests from the clipper head after each use with the cleaning brush (included in set).

Oiling the Clipper Heads

Use clipper oil (#23872-25) for care and longevity of the clipper heads. The blades have to be oiled before and after each use to maintain correct performance of the device and avoid material wear.

How to do it: Drip 3 drops of oil on the teeth of the blade while the device is running and one drop each on the rear rails. Then switch the device off and dab off any excess oil with a clean, dry cloth.

Clipper Head Replacements

Once the performance of your clipper does no longer give the result you are accustomed to and you want to use a new or different clipper head, TRIXIE offers various clipper heads for each model:

#23873 Clipper Set Andis Type AGCB/#23872 Clipper Set Andis Type MBG-4
